

PARANORMAL INVESTIGATIONS

AT EASTERN STATE PENITENTIARY

 Areas of the penitentiary accessible during paranormal investigations.

 Spaces closed to the public.

 Electrical Outlet (110 V)

Approved areas are licensed by the City of Philadelphia for nighttime tours. Staff are not able to grant access to additional locations. Some areas may be periodically closed for routine maintenance, construction, repairs or other reasons.

Investigators are welcome to use any open outlets that are accessible and shown on this map. No Eastern State equipment may be unplugged from any outlet. Due to their location, breaker boxes are not accessible during paranormal investigations; therefore, any tripped breakers will remain off for the rest of the investigation. Our staff can only turn on or off lights that are controlled by a switch (Center, Cellblock 4, South Corridor and Baseball). Lights that are controlled by timers cannot be turned on or off.
